

Safety "Hot Topic" Sheet

Firefighter Safety Awareness

2 of the most dangerous offensive positions for a firefighter to be in are:

Operating **Above** a Fire

- Over a basement fire
- Above the fire floor
- On the roof ventilating

Operating **Below** a Fire

- Under fire in the attic
- Under the fire floor
- Under fire in a concealed space

Use Risk Assessment, Thermal Imaging, Proper Scene Size-up and Condition Evaluation at all times in these environments.
